 Common European Framework of Reference for Languages

- Communication skills**
- Teamplayer. I gained this competence while working in different companies, projects and organisations.
  - Patience and time management. In work, as in life, there are two main key competence to be as productive as possible - time management and patience. Time management is with me in every step I go. Be it planing and carrying out project activities or just planning my tasks step-by-step.
  - Adaptability. During weeks spent in different "Youth in action"/"Erasmus+" projects across the Europe in multicultural environment taught me to adapt and work in any environment
  - Communicability. During my work years I had to work with people from freelancers to CEO's and that experience gave a a broader view and bigger practice in working with everyone side-by-side. Be it presentation in board meeting, or be it non-formal meetings with my boss.
